Criteria	Level	Comments
Application of knowledge and under-standing (20%)	Requirements met	Well done on including almost all of the artefacts created in this module, including your summative assessments. Please aim to include one from each unit in future modules. You were also able to discuss/review some of the artefacts which is a good point to criticality in your work. To enhance your work, you should clearly map (or tag) any artefact in your e-portfolio to the learning outcome it covers. Some description of this mapping exercise is also required. This helps you to ensure that the module is delivering on its objectives, in your own words. Be sure to also include any feedback you have received from your tutor or peers on any submission in the module.
Collaboration/ independent working (20%)	Most requirements met	In terms of collaboration, you have included your contribution to the discussion forum in this module as well as their responses to your post. It's clear that you have collaborated very well with members of your cohort. The discussion forum helps to showcase your interaction with your fellow students. So, adding your responses to your peers' posts would have helped you fully meet this criterion.
Criticality (40%)	Requirements met	You have provided excellent reflections on what you have learnt and how this affects your learning going forward, based on the artefacts submitted. You enhanced your reflection by reviewing the challenges you faced and how you overcame them, along with your thoughts on some of the activities you have carried out in the module. Well done. This all helps to show that you are very aware of your own learning process. On a separate note, please ensure you let us know how we can help you, where applicable. You also addressed some of your career and personal development in your reflection, including a skills matrix and action plan – well done.
Structure and Presentation (as detailed in the assessment guidance) (10%)	Some requirements met	You have correctly used GitHub Pages, and your layout is well structured so that it is easy to follow. Please try to ensure that linked documents can be viewed in GitHub/online rather than being downloaded (pdfs).
Academic integrity (10%)	Requirements met	Document is error-free. References and citations are present.

Overall comments
Positives: • Your content and reflections show that you are clearly aware of the learning outcomes of the module, as well as those of the e-portfolio in general, and seek to ensure you meet them.
Points for development: • Please review my comments in each section which will help to enhance your work. Particular attention should be paid to ensuring you meet the e-portfolio requirements as described in the e-portfolio guidance.
