

## RMPP Weekly Reflections

### Unit 6 Reflection

Unit 6 focused on questionnaires. Most of the time was focused on preparing for the summative Literature Review assignment; however, there was an opportunity to research and critique a questionnaire in the Wiki Activity. This was a helpful task as I encompassed challenges in locating a questionnaire I deemed suitable to critique first.

Often, the data is used from questionnaires, yet the questionnaire itself was not always published. The analysis of the work undertaken meant that I could reconsider design ideas and aim for valid and reliable data in results when undertaking future investigations. In particular, I found that the questionnaires need language and readability levels to be pitched at a particular age range (Callaghan, 2023).
